

# COMPLETE PYTHON TRAINING

## Module - 1 Python Basics

Introduction

Variables

Data Structures

List

Tuples

Dictionaries

Decision Making

Loops

Functions

File Operations

Python Modules

Introduction To Numpy

Introduction To Matplotlib

Introduction To OpenCv

OOP

6 Hr Duration

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 2 Python Advanced

### Part - 1

15 Hr Duration

Python Programming Basics

- Variable Types
- Operators (Arithmetic. Relational, Assignment, Logical.Bitwise)
- Decision Making
- Repetition (Loops)
- Data Structures (Lists, Tuples, Dictionaries)
- Functions

Quiz from Python Programming Basics

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 2 Python Advanced

### Part - 2

Python Modules and Contributed Modules (Matplotlib, Numpy and Pandas) for data handling and preprocessing

- Introduction to python modules and application
- Inbuilt essential python modules (datetime, math, os and etc)
- Creating own customized modules

Exercise from numpy for data processing

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 2 Python Advanced

### Part - 3

Image Processing with OpenCV

- Pixelwise Operations
- Drawing Functions
- Color Spaces
- Point Processing and Operations
- Thresholding
- Color Segmentations
- Neighborhood Operations and Filters
- Morphological Operations
- Video Loading and Processing
- Image Transformations
- Geometric Transformations
- Contour Operations

**Plant Height Detection using color segmentation and contour operations**

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 2 Python Advanced

### Part - 4

#### Machine Learning with Scikit Learn

- Introduction to Machine Learning, Supervised Machine Learning
- Identifying Features and Labels
- Classification and Regression Problems
- Machine Learning Algorithms in detail (Regression, Classification, Clustering, Dimensionality Reduction Algorithms)
- Introduction to K Nearest Neighbor Classifier
- Euclidean Distance
- Choosing the optimal K value

Project : **Character Recognition using K Nearest Neighbor Algorithm**

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 2 Python Advanced

### Part - 5

#### Web framework development with Flask

- Introduction to Python Web-frameworks
- Introduction to Python Backend development with Flask
- Flask Routes, URL bindings and HTTP Methods
- Template Rendering and Static Files
- Request Objects, Data Transfer, and File uploading
- Loading the trained Neural Network models and Machine Learning Models into the backend
- Deployment of Python backends in local server

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 3

### 5 Python Projects For Beginners

- 1.Real Time Model Training and Face Recognition
- 2.Build your own Music Player
- 3.Search Application
- 4.GUI Email Sender
- 5.Student Management System

Duration : 6 Hrs

**Contact** - +91 7225939477

**Mail** - [pythonadvanceprojects@gmail.com](mailto:pythonadvanceprojects@gmail.com)

# COMPLETE PYTHON TRAINING

## Module - 4

### 7 Python Projects For Intermediate Dev

1.Chatbot

Duration : 15 Hrs

2.Movie Description

3.Talking Dictionary

4.Restaurant Management System with sending email

5.Professional Login and Registration Form

6.On Screen Keyboard

7.Typing Master ( Pygame )

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## **Module - 5** Machine Learning With 5 Projects

Introduction to Machine Learning, Supervised ML, Introduction to nearest Neighbours classifier, and handwritten digits recognition.

**Project 1 - Handwritten digits recognition - PC App/Web App Development using tkinter and flask.**

**Project 2 - Face Recognition using support vector machine and principal component analysis.**

**Project 3 - Predicting the risk of having heart disease using linear regression.**

**Project 4 - Brain Tumor Detection using color segmentation with KMeans Clustering.**

**Introduction to object detection with cascade classifier and 68 landmarks detection algorithm**

**Project 5 - Vehicle detection and counting using cascade classifiers**

Duration - 15 Hr

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## **Module - 6**    Deep Learning With 4 Projects

**Part - 1** Introduction to Deep Learning, Supervised Deep Learning, Introduction to feed forward neural networks.

**Project - 1** Handwritten Digit Recognition (Web App Development Using Flask with feed forward neural networks)

**Project - 2** Introduction to Convolution Neural Networks and Face Mask Detection with Convolutional Neural Network

**Project - 3** Covid-19 Positive and Negative Detection Web Application With X-Ray Images Using Convolutional Neural Networks

**Project - 4** Custom Object Detection Using Tensorflow Object Detection API

**Duration - 12 Hr**

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 7

### Building and Deploying Healthcare Chatbot

- It is a healthcare chatbot. It is designed to handle all user inputs.
- It can recognize more than 280 symptoms.
- It can also recognize more than 445 health issues.
- It can be used to make a diagnosis by 280+ symptoms and to get detailed information about 445+ health issues.
- The detailed information about the health issue includes name, description, possible symptoms, treatment, and medical condition of the health problem.
- It can be deployed on any platform such as website, mobile apps, IoTs etc.

Duration - 3 Hr

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 8 Django with 4 Projects

- Django
- Models
- create read update delete operations
- Object Relational Mapping With Database
- Authentication
- Message requests
- Django Inbuilt Libraries
- security measures

Duration - 4 Hr

### 2 Minor Projects :

- Project 1 : To-Do Application
- Project 2 : Crud Application

### 2 Major Projects :

- Project 1 : Building A Covid-19 Live Web App
- Project 2 : Building A Pizza Delivery Management System

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## Module - 9

## Django Advanced

Duration : 2 Hr

- Url routing
  - Forms
  - Post Requests
  - Channels
  - Socket Programming
  - working with Templates
- 
- How to use the ASGI, Redis-Server, Channels and WebSockets in a very simplified way.
  - Channels is really an interesting topic which we have to look at while developing synchronous applications such as messenger, zoom etc.
  - but the way it is written in the documentation is a little hard for the beginner to understand the concept behind it,
  - i made an extensive research to simply the documentation which can be understandable by a beginner Django developer and came up with this course for you, thats the reason why the length of this course is very short,
  - and when it comes to the curriculum, we will learn url routing, forms ,post requests, templates, ASGI, class based and function based views and socket programming with channels
  - and finally we will come up with an interesting project, a group chat application, and i hope you will have a wonderful journey while accessing this content.

**Mail** - pythonadvanceprojects@gmail.com

# COMPLETE PYTHON TRAINING

## **Bonuses :**

- **Building One Amazing Major Project**
- **Building One Portfolio Website**
- **Building Landing Page**

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# Why Us ?

**We are from instagram community of over 230k Followers around Social Media Platforms ( Id - python.advance.projects )**

**Trained Over 5000 Students in Last 3 Months.**

**Got All Positive Feedback From Students and now they can build projects on their own.**

**Contact - +91 7225939477**

**Mail - [pythonadvanceprojects@gmail.com](mailto:pythonadvanceprojects@gmail.com)**

# What you will get ?

- **Lifetime Access Of Our Portal**
- **All resources code, content, dataset.**
- **All Contains Step by step tutorials.**
- **4 Certificates**
- **Exclusive Calls Every Month From May 2021 related to career guidance.**

**Contact** - +91 7225939477

**Mail** - pythonadvanceprojects@gmail.com

# **Fee Structure :**

**Fees is only 1999/- Or 30 USD for this complete program.**

## **How to Enroll :**

**Indian Students ( Link Below )**

<https://rzp.io/l/FF8rzCVEpl>

**International Students ( Link Below )**

<https://rzp.io/l/vEo1wSvxo>

**Contact** - +91 7225939477
