<b>1. INTRODUCTION TO OPTICAL FIBERS</b>	<b>1-14</b>
1.1 Historical Perspective	1
1.1.1 Future Trend	7
1.2 Broadband Optical Fiber Communication System	8
1.2.1 How Communication is Done?	8
1.2.2 Need for Large Information Capacity	9
1.2.3 Why Digital Communication Electronics?	10
1.3 Pulse Duration and Bandwidth of an Optical Fiber	13
<i>Problems</i>	14
<i>References</i>	14
<b>2. OPTICAL FIBERS AND FIBER CABLES</b>	<b>15-69</b>
2.1 Introduction	15
2.1.1 Terminology of Light	15
2.2 Classification of Fibers	27
2.2.1 Parameters of Monomode and Multimode Fibers	30
2.2.2 Modes in Mono and Multimode Fibers	32
2.3 Step Index Fibers: Numerical Aperture and Multipath Dispersion	33
2.3.1 Propagation and Multipath Dispersion in Graded Index Fiber	37
2.3.2 Single Mode Fiber	37
2.3.3 Numerical Aperture	38
2.3.4 Different Types of Monomode Fibers	39
2.3.5 Description of Modes	41
2.3.6 Types of Modes	42
2.4 Attenuation	44
2.4.1 Bending Losses	44
2.4.2 Attenuation Loss	46
2.5 Absorption	48
2.6 Rayleigh Scattering	49
2.6.1 Rayleigh Scattering Coefficient	49
2.6.2 Nonlinear Scattering in Fibers	51

2.7	Fabrication of Optical Fiber	53	
2.8	Drawing of Optical Fibers	54	
2.9	Classification of Fiber Cables	57	
2.10	The Selection of Fiber Cable	62	
2.11	Installation Procedures	63	
2.12	Performance of Optical Fiber Cables	64	
2.12.1	Mini Bundle Cable	64	
2.13	High Performance Optical Communications Cable	66	
	<i>Problems</i>	68	
	<i>References</i>	69	
<b>3.</b>	<b>ELECTROLUMINESCENT SOURCES</b>		<b>70-173</b>
3.1	Introduction	70	
	<b>Part I Semiconductor Photon Optical Sources</b>		<b>71</b>
3.2	Light Sources and Transmitters	71	
3.2.1	Light Emitting Diodes (LEDs)	72	
3.3	<i>p-n</i> Junction Semiconductor	74	
3.3.1	Formation of <i>p-n</i> Junction	75	
3.3.2	Drift and Diffusion Current	75	
3.4	The Potential Barrier at the <i>p-n</i> Junction	78	
3.4.1	<i>p-n</i> Junction with Forward Bias	83	
3.4.2	Breakdown of a <i>p-n</i> Junction Diode	83	
3.4.3	Current Flow Across a <i>p-n</i> Junction	86	
3.5	LED Light Sources	92	
3.5.1	Advantages and Disadvantages of Light Emitting Diodes	94	
3.5.2	Light Emitting Diodes	95	
3.5.3	Burrus LEDs	95	
3.5.4	Edge Emitting LED (ELED)	97	
3.6	LED to Fiber Launched System	99	
3.7	Semiconductor Laser Diode	101	
3.8	Heterostructure Semiconductor Lasers	105	
3.9	Single-Frequency Semiconductor Lasers	109	
3.10	The Semiconductor Injection Laser	112	
3.11	Quantum Well Lasers	115	
3.12	Index Guided Lasers	115	
3.13	Single-Frequency Injection Lasers	117	
3.13.1	Distributed Feedback Lasers	118	
3.14	Packaging of LED and Laser Diodes	120	
3.14.1	LED Packaging	120	
3.14.2	Laser Diode Packaging	121	
3.15	Frequency Chirping	122	
	<b>Part II Unguided Optical Communication</b>		<b>123</b>
3.16	Lasing Action in Various Laser Sources	123	
3.17	Introduction to Solid State Lasers	125	
3.17.1	Black Body Radiation	125	
3.17.2	Boltzmann Statistics	126	
3.17.3	Einstein Coefficients for Absorption and Emission	126	

3.18	Laser Oscillator	135	
3.18.1	Operation at Threshold	136	
3.19	Optical Resonator	139	
3.19.1	Intensity Distribution of Transverse Modes	139	
3.19.2	Characteristics of a Gaussian Beam	144	
3.20	Resonator Configurations	145	
3.20.1	Stability of Laser Resonators	149	
3.21	Active Resonator	150	
3.22	Spectral Characteristics of Laser Output	153	
3.22.1	Ruby Solidstate Laser	155	
3.23	Commercially Available Ruby Laser Rods	159	
3.23.1	Nd: YAG Solid State Laser	160	
3.23.2	Nd: YAG Laser Rods	161	
3.23.3	Nd: Glass Solid State Laser	163	
3.24	Commercially Available Laser Rods	165	
3.25	Comparison of Ruby, Nd: YAG, and Nd: Glass Solid State Lasers	166	
3.26	Q-Switches and External Switching Devices	167	
3.26.1	Pulse-Reflection Mode Q-Switches	167	
3.27	Mode Locking	167	
3.27.1	Passive Mode Locking	170	
3.27.2	Active Mode Locking	170	
3.28	Glass Fiber Laser	171	
	<i>Problems</i>	172	
	<i>References</i>	173	

#### 4. OPTICAL FIBER TRANSMITTER

174-217

4.1	Introduction	174	
4.2	Direct Intensity Modulation	176	
4.3	Direct Optical Modulation	177	
4.4	Digital Communication System	179	
4.5	Sampling	180	
4.5.1	Sampling Technique	180	
4.6	Analog to Digital Conversion	181	
4.6.1	Operation of the Analog to Digital Converter	181	
4.7	Digitization and Modulation	185	
4.8	Encoding the Digital Signals	187	
4.8.1	Encoding Schemes	189	
4.9	Generation of Sampling Signal	192	
4.10	Quantizing	192	
4.11	Encoding	194	
4.12	Digital Multiplexers	196	
4.13	ASK, FSK, PSK	196	
4.13.1	Amplitude Shift Keying (ASK)	197	
4.13.2	Frequency Shift Keying (FSK)	198	
4.13.3	Phase Shift Keying (PSK)	199	

4.14 Line Coding 201  
 4.14.1 RZ Coding 202  
 4.14.2 NRZ Coding 203  
 4.14.3 Block Coding 204  
 4.15 LED Analog Transmission 207  
 4.16 LED Digital Transmission 209  
 4.17 Laser Semiconductor Transmitters 214  
*Problems* 216  
*References* 217

**5. OPTICAL DETECTORS 218-265**

5.1 Introduction 218  
 5.2 Optical Detectors 219  
 5.2.1 Photoemissive Diode 219  
 5.2.2 Photoconductive Diode 221  
 5.2.3 Photovoltaic Diode 224  
 5.2.4 Avalanche Photodiode 229  
 5.2.5 Photo Transistor 232  
 5.2.6 PIN Photodiodes 234  
 5.3 Pyroelectric Detectors 237  
 5.3.1 Pyroelectric Detector for Laser Pulse Shapes 245  
 5.3.2 Pulse Shaping 246  
 5.3.3 Parametric Study of Detectors 247  
 5.3.4 Design of Arrays (Several Elements in a Linear Array) 249  
 5.3.5 A Pyroelectric Power Meter for the Measurement of Low Level Laser Radiation 251  
 5.3.5 Pyroelectric Reflectometer (PR) 259  
 5.3.7 Pyroelectric Joulemeter 260  
*Problems* 264  
*References* 265

**6. OPTICAL RECEIVER SYSTEMS 266-310**

6.1 Noise Sources 266  
 6.1.1 Noise in Optical Detector 271  
 6.1.2 Quantum Noise 272  
 6.2 Receivers for Fiber Optic Communication Systems 274  
 6.2.1 Basic Components of a Digital Fiber Optic Communication Receiver 274  
 6.3 Front-Ends for Digital Fiber Optic Communication Receiver 275  
 6.4 Coherent Optical Fiber Detection System 286  
 6.4.1 Direct Detection Performance 287  
 6.4.2 Coherent Detection Principles 287  
 6.4.3 Coherent System Performance 290  
 6.4.4 Comparison of Direct and Coherent Detection Performance 291  
 6.4.5 Practical Coherent System Constraints 292

6.5	Coherent Optical Communication Experiments	293	
6.5.1	Homodyne System Experiment Using Gas Lasers	295	
6.5.2	Heterodyne System Experiment Using External Cavity Lasers		296
6.5.3	Heterodyne System Experiment Using a DFB Laser Transmitter		298
6.5.4	Frequency Multiplexed Coherent System Experiment	300	
6.6	Transmission and Detection Systems	302	
6.7	Noise Effects on System Performance	305	
6.7.1	Modal Noise	305	
6.7.2	Chirping	307	
	<i>Problems</i>	308	
	<i>References</i>	309	

## 7. OPTICAL FIBER CONNECTIONS AND OPTICAL AMPLIFICATION

311-365

7.1	Introduction	311	
7.2	Optical Fiber Connectors	311	
7.2.1	Basic Components of Optical Fiber Connectors		312
7.3	Types of Optical Fiber Connectors	313	
7.4	Fiber Connector Standards	316	
7.4.1	Connector Designs from Past to Present	316	
7.4.2	Termination Process	316	
7.4.3	Tests and Measurement after Installation of Fiber Cable		317
7.5	Loss Mechanism	318	
7.5.1	Insertion Loss	318	
7.5.2	Return Loss	318	
7.5.3	Connection Losses (Intrinsic Losses)		320
7.5.4	Extrinsic Losses	322	
7.5.5	Reflection Loss	323	
7.6	Splicing Techniques	325	
7.6.1	Procedure of Splicing	325	
7.7	Types of Splicing	327	
7.7.1	Mechanical Splicing	327	
7.7.2	Fusion Splicing	328	
7.7.3	Fusion Splice Protection	331	
7.7.4	Application of Different Test Equipment	332	
7.8	Optical Switches	336	
7.8.1	Single Switches	336	
7.8.2	Multistage (Large) Switches	339	
7.9	Wavelength Converters	340	
7.10	Functional Modules	342	
7.10.1	Optical Add/Drop Multiplexers (OADM)	342	
7.10.2	Optical Cross Connect (OXC)	342	
7.11	Wavelength-Division Multiplexers and Demultiplexers		345
7.11.1	All-Fiber WDMs	346	
7.11.2	Arrayed-Waveguide Grating WDMs	348	

7.11.3	Diffraction-Grating WDMs	349
7.11.4	WDM MUXs and DEMUXs	352
7.12	Optical Filters	352
7.13	Isolators and Attenuators	354
7.13.1	Isolators: Principle of Operation	354
7.14	Attenuators	355
7.14.1	Types of Attenuators	357
7.15	Couplers and Splitters	358
7.15.1	Advantages of FBT Couplers	359
7.15.2	Port Configurations of Couplers	360
7.16	Optical Amplifier	362
7.16.1	Design of an Optical Amplifier	363
	<i>Problems</i>	365
	<i>References</i>	365

**8. TELECOMMUNICATION APPLICATION**

**366–425**

8.1	Introduction	366
8.1.1	Advantages of Optical Fiber Communication Links	367
8.2	Generations of Optical Fiber Link	368
8.2.1	First Generation System	368
8.2.2	Second Generation System	368
8.2.3	Third Generation System	369
8.2.4	Fourth Generation System	369
8.3	Network Layers	371
8.4	Local Area Network General Considerations	373
8.4.1	LAN Standards	375
8.4.2	Other Standards	376
8.4.3	The OSI Model and Local Area Networks	376
8.5	Optical Fiber LAN Link	377
8.5.1	The Data Link System	377
8.5.2	Optical Data Highway System Components	377
8.5.3	Optical/Electrical Interface (OEI)	379
8.5.4	Optical Fiber Cable	379
8.6	Optical Networking Technology in Enterprise	380
8.6.1	Application Areas	380
8.6.2	Future Trends in Optical Networking	384
8.7	Description of 8 Mb/s Optical Fiber Communication Link	385
8.7.1	System Architecture	385
8.7.2	System Technology and Techniques	387
8.7.3	Hardware Architecture	387
8.8	Description of 2.5 Gb/s Optical Fiber Communication Link	397
8.8.1	Optical Transport Network Concept	398
8.8.2	Optical Cross-connect	399
8.9	Optical Access Line for CATV Services	405
8.9.1	Network Management	410
8.9.2	Future Developments	410
8.9.3	Cable TV Network	414

8.10	Optical Submarine Cable Coastal Networks	417
8.10.1	Optical Submarine Cable Coastal Networks: Two Examples of in Service Networks	417
8.10.2	Technology Evolution in the Field of Optical Submarine Cable Coastal Networks	420
8.11	Power Budget	421
	<i>Problems</i>	423
	<i>References</i>	424
	<i>Annexure 1</i>	425

## **9. APPLICATIONS OF OPTICAL FIBER SENSORS AND SYSTEMS 426–440**

9.1	Introduction	426
9.2	Types of Optical Fiber Sensors	427
9.2.1	Extrinsic Sensors	427
9.2.2	Intrinsic Sensors	428
9.3	Industrial Applications of Optical Fiber Sensors and Systems	429
9.3.1	Optical Fiber Flow Sensors (Intrinsic)	429
9.3.2	Optical Fiber Displacement Sensors (Extrinsic)	430
9.3.3	Current Measurement by Single Mode Optical Fiber Sensors	431
9.3.4	Photoelastic Pressure Fiber Sensors	432
9.3.5	Fiber Bragg Gratings for Strain and Temperature Sensors	433
9.3.6	Optical Fiber Temperature Sensor with Polymer Ceramic Composites	435
9.3.7	Systems Applications	436
9.4	Civil Engineering Applications of Optical Fiber Sensors	436
9.5	Military Applications of Optical Fiber Sensors and Systems	437
9.6	Applications of Optical Fiber Communications in Consumer Products	438
9.7	Miscellaneous Applications of Optical Fiber Systems	439
	<i>Problems</i>	440
	<i>References</i>	440

## **10. NETWORK APPLICATIONS OF OPTICAL FIBERS 441–477**

10.1	Introduction	441
10.2	Data Networks	442
10.2.1	Local Area Networks (LANs)	442
10.3	Network Topologies	443
10.3.1	Types of Topologies	443
10.4	Network Transport Architecture	447
10.4.1	LAN Structure	447
10.4.2	Ethernet	449
10.4.3	10 Mb/s Ethernet Link	449
10.4.4	100 Mb/s Ethernet Link	450
10.4.5	1 Gb/s Ethernet Link	451
10.5	Synchronous Optical Network (SONET)	451
10.5.1	SONET Standards	451
10.5.2	SONET Architecture	453

# Textbook On Optical Fiber Communication And Its Applications
